CERTIFICATIONS

UL GREENGUARD
Certification helps demonstrate compliance with chemical emission standards and your commitment to healthier indoor environments, driving trust among health and safety focused customers.

U.S. Green Building Council
USGBC accelerates and scales the transformation of the built environment. The evolution of LEED through LEED v5 sets a new standard for sustainable building, pushes boundaries, and creates efficient and extraordinary spaces.

This certification means our products have been independently tested by NSF International and complies with strict public health and safety standards. It ensures products meet rigorous testing, label accuracy, and unannounced facility audits, often serving as the "gold standard" for safety.
